Chapter 1

End User License Agreement

User license for the Digital Intelligent Video Architecture DIVA® software.

READ THIS CAREFULLY!

This End User License Agreement (EULA) is a legal contract between you (natural person or legal person) and the supplier (producer) of DIVA® hardware, firmware and software ("Software Product or Software"), the above product of which you have received. The Software product consists of computer software, the accompanying media, printed documentation and any on-line or electronic documentation. The act of using the DIVA® software means that you agree with the regulations of this contract. If you do not agree with the regulations of this contract, the supplier/producer is not prepared to give you the user right to use the Software product. You're not allowed to use the software product in this case.

SOFTWARE PRODUCT LICENSE The Software product in the DIVA® is protected by copyrights and international copyright treaties, and by other intellectual ownership laws and treaties. The software product is given in license and not sold.

GRANT OF THE RIGHT OF USE. This contract grants you the following rights /obligations:

- Use of the software in the DIVA®
- No reverse-engineering, decompilation or dismantling
- It is not permitted to add or remove software
- It is not permitted to add or remove hardware
- It is not permitted to change any settings in the operating system with the exception of installation, de-installation or settings of printing equipment.

- Camera IP setup programma's
For supported cameras
- Adam IO IP setup program

Chapter 3

Installation instructions

All VDG Security software products are protected by a software license key. In order to run this product you will need to obtain a software license file before installing the DIVA software. This software package will not install on a Diva 1.x system, please uninstall Diva before continuing the Diva 2.x installation. It will also not install if the SLA does not allow an upgrade.

3.1 Installation procedure

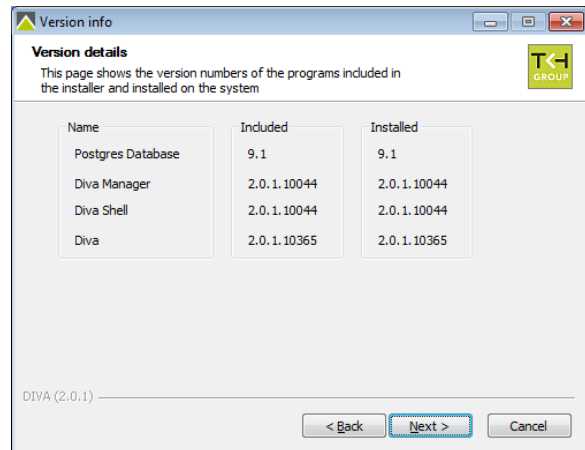

The first page shows the license agreement. Press 'I agree' button to continue.

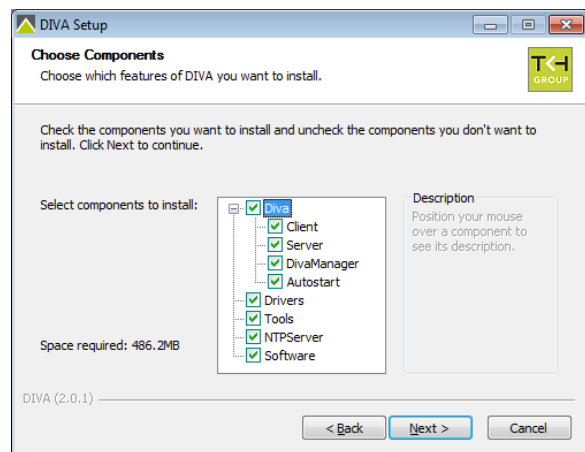

This screen shows the version information of the installed and included (sub)components.

- Diva version info
- DivaShell version info
- DivaManager version info
- Postgres database version info

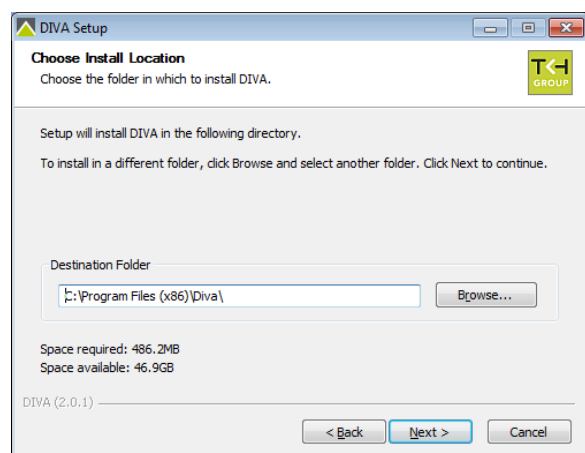

If components are not yet installed, the label 'uninstalled' is shown. Press 'Next' to continue installation.

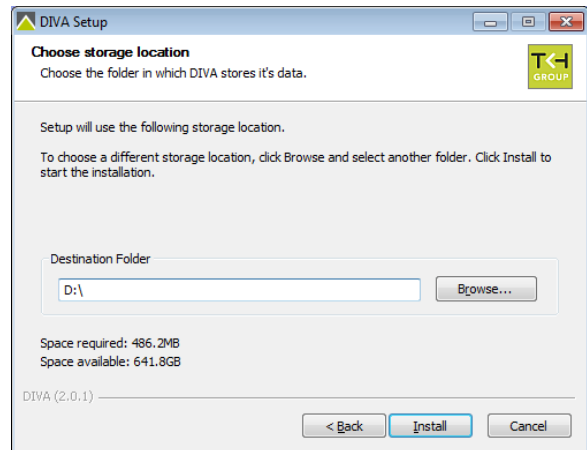

Choose components which need to be installed. Selecting the 'Server' option automatically selects components which are required for a server installation.

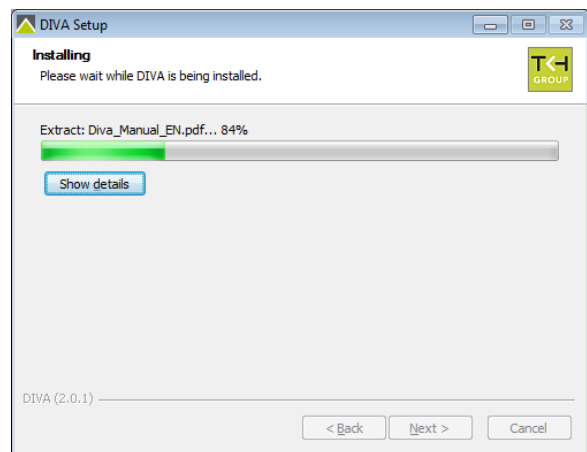

Choose DIVA installation folder on this page.

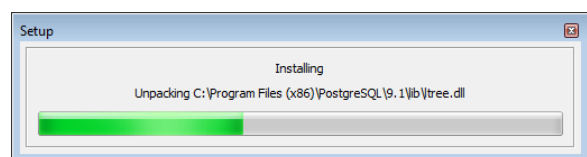

Choose storage location for videodata and database on this page.

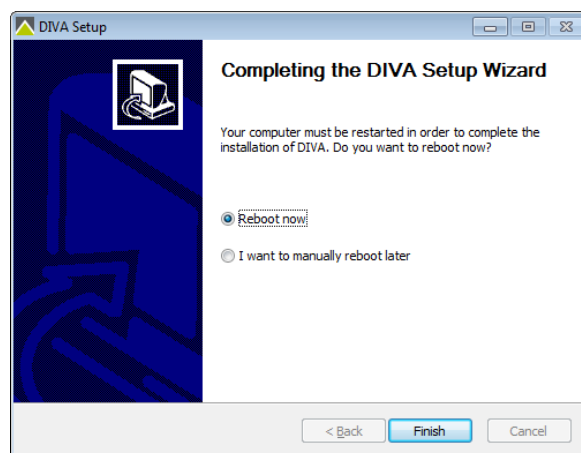

Progress of DIVA installation.

Progress of Postgres Database installation. This installation will only be executed if the 'Server' option is chosen in the Install Options page.

Choose to reboot the pc after installation. This is required if Diva is installed the first time.

3.2 After installation

After Diva is installed 3 icons will appear on the desktop:

- Diva, shortcut to start the Diva software
- Manuals, shortcut to the manuals folder
- DivaSystemInfo, small program to create zip file of diva settings, logs, system information and system logs.

These shortcuts together with several other (like Diva Uninstall) are also created in the Windows Startmenu.

3.3 Updating DIVA software

To update the DIVA software follow the same steps as in the installation procedure. Make sure DIVA and DIVAShell are not running before starting DivaSetup. DIVA settings will not be removed. The software can only be updated if current Software License agreement (SLA) allows it. An error dialog will appear if SLA is violated.

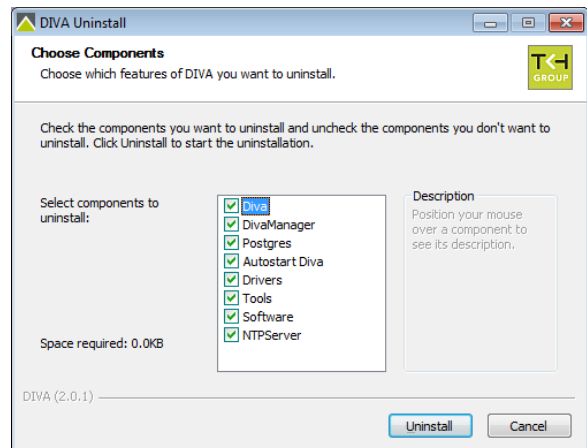

Chapter 4

Uninstall instructions

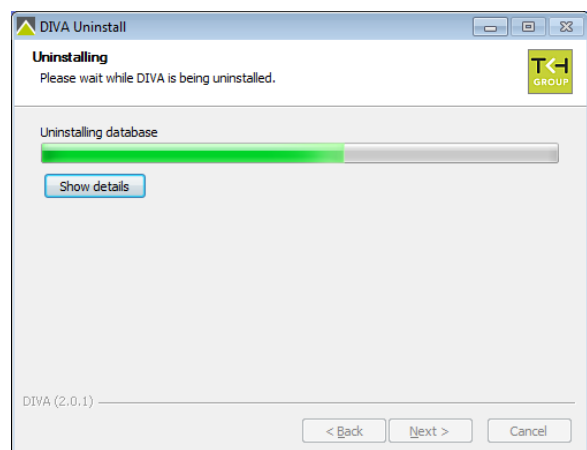

To deinstall the DIVA software go to Window Startmenu-Programs-DIVA and choose 'Uninstall DIVA'.

4.1 Uninstall procedure

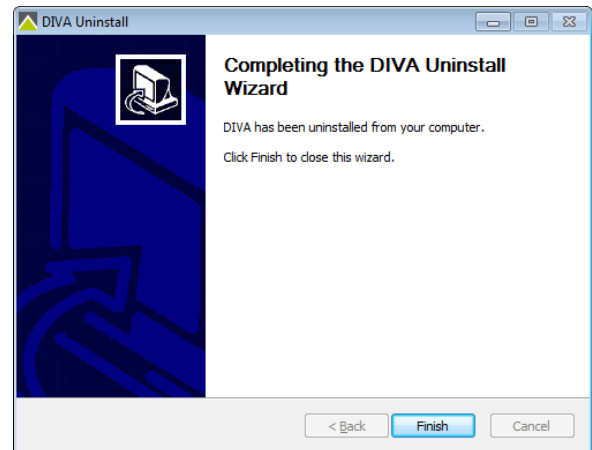

Choose components which need to be uninstalled.

Progress of DIVA uninstallation.

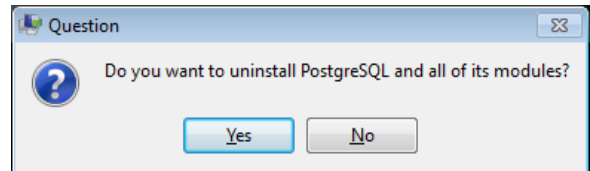

Uninstallation of DIVA completed.

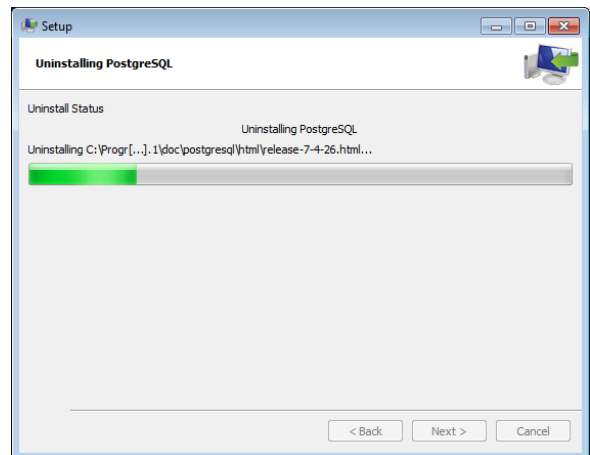

4.2 Uninstall Postgres database

Confirmation to uninstall Postgres database, press yes to uninstall the database.

IMPORTANT: It also removes the database contents.

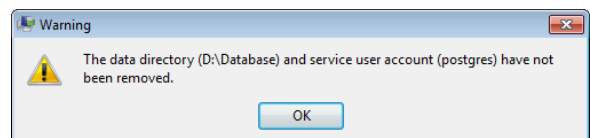

Progress of Postgres uninstallation.

Dialog after uninstallation of Postgres.

IMPORTANT: Database content is removed regardless of dialog message!

4.3 Uninstall NTP Timeserver

Confirmation of NTP uninstallation, follow procedure.
